# Phlebotomy

The Phlebotomy Certificate program is a one-year certificate program designed to prepare students for entry level positions as phlebotomists and laboratory technicians in hospitals, clinics, and other medical facilities. Phlebotomists draw blood from patients in preparation for medical testing. A phlebotomy technician is an integral member of the medical laboratory team whose primary function is the collection of blood samples from patients by venipuncture or dermal puncture. The phlebotomy technician facilitates the collection and transportation of laboratory specimens and is often the patients only contact with the medical laboratory.

Students will also participate in a Phlebotomy Internship. This internship provides practical phlebotomy experience in a clinical setting. WCCC partners with several hospitals and clinics for clinical placements.

Upon successful completion of this program, the graduates will be qualified to sit for the Phlebotomy Technician Registration Exam. Graduates will become certified phlebotomists upon passing the exam.

The Phlebotomy program requires completion of the Student Disclosure of Criminal Convictions, Pending Criminal Charges and Certain Disqualifications. Completion of this form does not automatically deny admission to the program. Prospective applicants will meet with the Dean of Enrollment Management and Student Services to review information. The form can be found at [wccc.me.edu/admissions-aid/admissions/admission-forms-documents](http://wccc.me.edu/admissions-aid/admissions/admission-forms-documents).

For more program specific information, please contact the program advisor Cindy Moholland, [cmoholland@wccc.me.edu](mailto:cmoholland@wccc.me.edu), 207-454-1016.

Washington County Community College is an equal opportunity/affirmative action institution and employer. For more information; please call Tatiana Osmond, Affirmative Action Officer, at 454-1040
