STEP 1

Open your Degree Audit

Find degree maps in the Student Portal. Open the WCCC registration page and select **Login to Anthology Student/Faculty Portals**. Choose the Student Portal and sign in with your **@mainecc.edu** account.

In the left menu, open **Academics > Degree Audit**. If you have more than one program, select the program you are registering for.

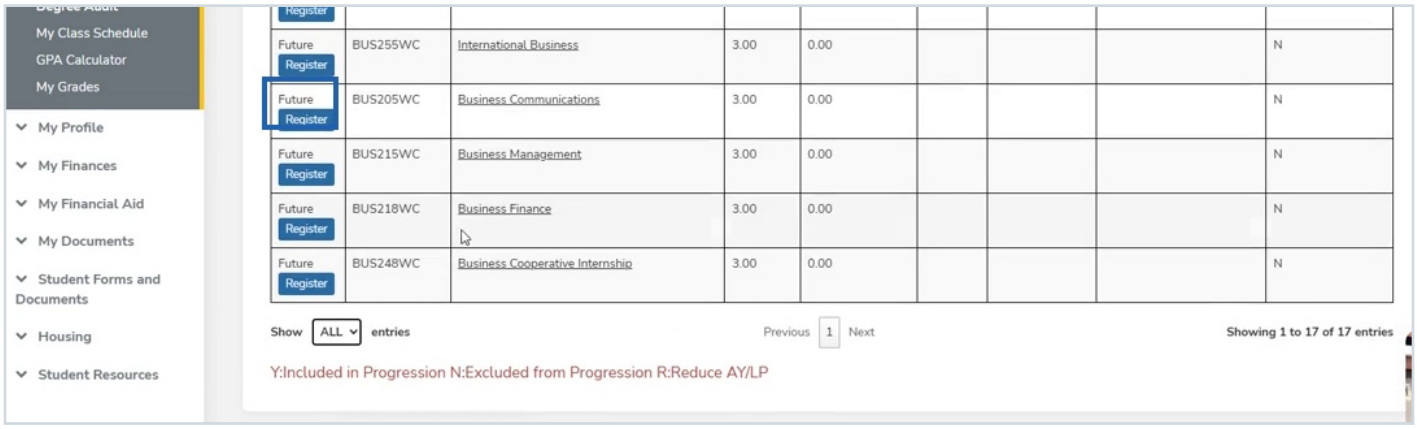

Screenshots come from WCCC training videos. Example terms and courses are historical; choose your intended term and courses. Personal details have been removed.

STEP 2

Choose a course you need

Review the audit with your advisor to identify remaining requirements. In the **Course List**, find the course you plan to take and select its blue **Register** button.

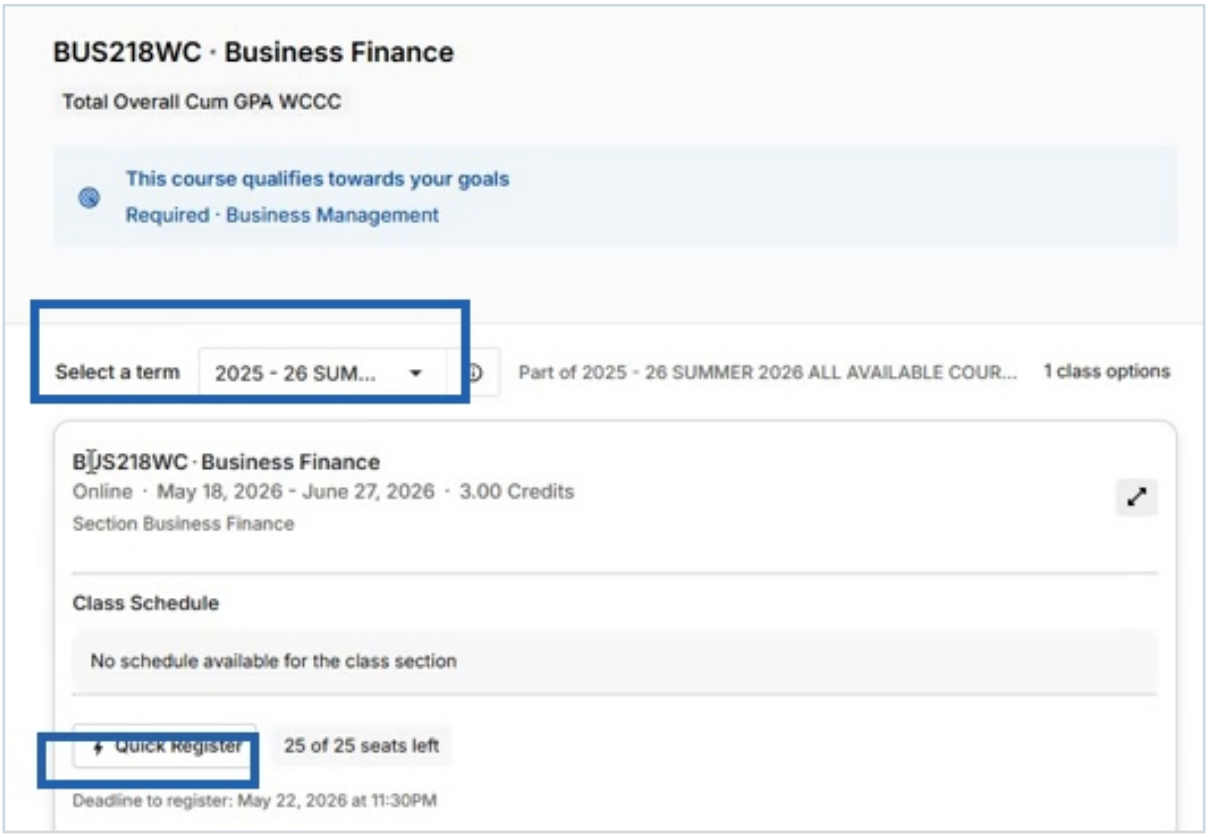

The example highlights a Register button beside a future course. Repeat this process for each course in your plan.

A course in your degree requirements is not a guarantee that a section is offered in your intended term. Review the available class options on the next screen.

STEP 3

Select the term and class

Use **Select a term** to choose the correct semester or session. Review the course, section, dates, available seats and any class schedule information.

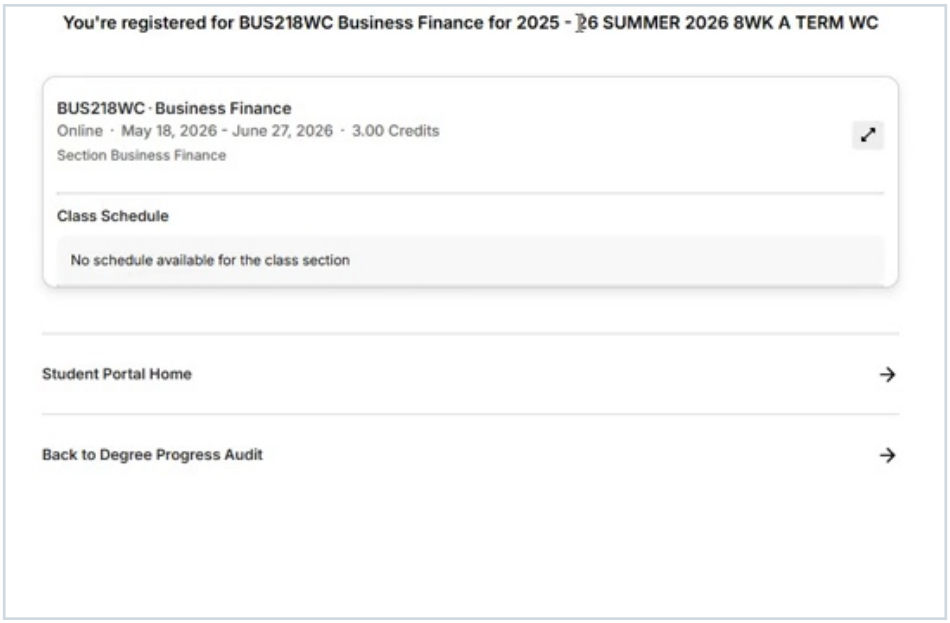

Select **Quick Register** for the class option you want. Wait for registration to finish before leaving the page.

Check the term every time. The summer term in this screenshot is an example. If a course is unavailable or you receive an error, contact your academic advisor.

STEP 4

Verify registration is complete

Look for the confirmation **"You're registered"** with the correct course and term. Use **Back to Degree Progress Audit** for another course or **Student Portal Home** when finished.

In the portal, open **Academics > My Class Schedule** and check every course, section and term.

Quick Register adds courses directly. After each addition, look for the registration confirmation. Repeat through Degree Audit for additional courses, then verify all additions in My Class Schedule.
